

## DATASHEET

# Captaris Workflow Wizard for SharePoint Portal Server 2003

*"Captaris has extensive experience integrating with Microsoft products and the Workflow Wizard is yet another offering that has seamless integration, allowing customers to install and run the two products together with ease" — Microsoft Corporation*

## OVERVIEW

The Captaris Workflow Wizard for SharePoint is powered by Teamplate and combines with Microsoft SharePoint Portal Server 2003 and technologies to deliver business process workflow to portals and collaborative workspaces maintained by Microsoft SharePoint.

Captaris Workflow structures the collaboration between groups, systems and individuals and provides accountability by documenting and recording collaboration activities. Typical business process applications include publishing approvals, archiving processes and collaborative document review and editing.

The Captaris Workflow Wizard for SharePoint is delivered as an easy-to-use extension that leverages the Microsoft SharePoint user interface, making it simple for Microsoft SharePoint users and administrators to create simple or complex workflows with minimal training.

## FEATURES

**Provides Out-of-the-box Functionality** - The Captaris Workflow Wizard for SharePoint provides a "no-scripting-required" solution for organizations where workflow is required to manage content. It installs, builds and administers workflow within the context of Microsoft SharePoint Portal Server 2003, providing a seamless interface to SPS users. It also provides information with the ability to build and deploy full-featured workflow without scripting or developer assistance.

**Includes Robust Feature Set** - The Captaris Workflow Wizard for SharePoint allows multi-approvals, parallel approvals, re-works and sophisticated workflow features. Microsoft SharePoint workflows can be easily tailored to accommodate an organization's business rules.

**Empowers Information Workers** - Allows anywhere, anytime, any device access; a task manager Web part, model directory Web part, an administration Web part, and a "step-by-step" Information Worker wizard interface.

**Delivers Business Value** - Realize a quick Return on Investment (ROI) and a lower Total Cost of Ownership (TCO) compared to other document management solutions.

## KEY FEATURES

- 100 percent ASP.NET and installs within the context of Microsoft SharePoint Portal Server 2003
- Workflow creation, deployment and task management within the context of Microsoft SharePoint Portal Server 2003
- Single login and transparent to Microsoft SharePoint Portal Server 2003 users
- "Out-of-the-box" and "No-Scripting-Required" functionality
- Task lists created for individual users with unlimited number of tasks
- Multi-approvals, re-work, serial, parallel or conditional workflow
- Wizard-driven business rule editor and Web form editor
- Seamless SharePoint UI
- Installation on either WSS or SPS
